Problem | Submissions | Leaderboard | Discussions | Editorial

A space explorer's ship crashed on Mars! They send a series of SOS messages to Earth for help.

Letters in some of the SOS messages are altered by cosmic radiation during transmission. Given the signal received by Earth as a string, s , determine how many letters of the SOS message have been changed by radiation.

Example

$s = \text{'SOSTOT'}$

The original message was SOS SOS. Two of the message's characters were changed in transit.

Function Description

Complete the marsExploration function in the editor below.

marsExploration has the following parameter(s):

- string s : the string as received on Earth

Returns

- int: the number of letters changed during transmission

Input Format

There is one line of input: a single string, s .

Constraints

- $1 \leq \text{length of } s \leq 99$
