

3. Longest Substring Without Repeating Characters

Medium Topics Companies Hint

Given a string `s`, find the length of the **longest substring** without duplicate characters.

Example 1:

Input: `s = "abcabcbb"`

Output: 3

Explanation: The answer is "abc", with the length of 3. Note that "bca" and "cab" are also correct answers.

Example 2:

Input: `s = "bbbbb"`

Output: 1

Explanation: The answer is "b", with the length of 1.

Example 3:

Input: `s = "pwwkew"`

Output: 3

Explanation: The answer is "wke", with the length of 3. Notice that the answer must be a substring, "pwke" is a subsequence and not a substring.

Constraints:

- $0 \leq s.length \leq 10^5$
- `s` consists of English letters, digits, symbols and spaces.

Code

Java Auto

```
1 import java.util.*;
2
3 class Solution {
4     public int lengthOfLongestSubstring(String s) {
5
6         HashSet<Character> set = new HashSet<>();
7
8         int left = 0;
9         int maxLength = 0;
10
11         for (int right = 0; right < s.length(); right++) {
12
13             // Remove characters until there is no duplicate
14             while (set.contains(s.charAt(right))) {
15                 set.remove(s.charAt(left));
```
